

## Sunwins Pellet Mill with Diesel Engine

### Introduction:

Our wood pellet mill can produce wood pellet and feedstuff pellet. It may also be applicable to biological fertilizer, organic manure as well as fertilizer for low-temperature granulation.

The raw material: sawdust, rice husk, cotton stalk, cottonseed skins, weeds, crop stalks and other plant wastes, especially low-bonding and unformed materials.

The moisture of raw materials is less than the national standard of 13%. If not, the raw material must be dried.

### Specification:

Model : PM150A

Power : 8 HP Diesel Engine

Flat die diameter: 150mm

Pellet diameter: 4 mm

Optional : 1.5 mm, 2mm,6 mm, 8mm, 10 mm

Material Humidity: 12%--20%

Capacity: 75 -100 kg/h

Dimension: 710x 390 x 910mm

Weight: 95kg
